NUMBER 1: JANUARY 1995

Editorial. *Derek W. March* 1
Generalized acoustic diffraction tomography. *Leiv-J. Gelius* 3
A sample of controlled experiments in diffraction tomography. *L.-J. Gelius* .. 31
Synthetic seismograms from generalized ray tracing. *Andrzej Hanyga and Hans B. Helle* 51
2D modelling of resistivity and magnetotelluric data from the Belvedere Spinello salt mine, Italy. *V. Iliceto, G Santarato and A. Zerilli* 77
A new velocity for clay–sand mixtures. *Shiyu Xu and Roy E. White* 91
Numerical tests of 3D true-amplitude zero-offset migration. *E. Filpo and P. Hubral* 119

NUMBER 2: FEBRUARY 1995

A joint inversion algorithm to process geoelectric and surface wave seismic data. Part I: basic ideas. *A Hering, R. Misiek, A. Gyulai, T. Ormos, M. Dobroka and L. Dresen* 135
Bootstrap statistics for velocity tomography: application of a new information criterion. *Osamu Nishizawa and Harufumi Noro* 157
Determination of a shallow velocity–depth model from seismic refraction data by coherence inversion. *Evgeny Landa, Shemer Keydar and Alex Kravtsov* . 177
Effect of mining subsidence on seismic velocity monitored by a repeated reflection profile. *S. Y. S. Al-Rawahy and N. R. Goulty* 191
Effective filtering of artifacts for implicit finite-difference paraxial wave equation migration. *C. Bunks* 203
The effects of source and receiver motion on seismic data. *Gary Hampson and Helmut Jakubowicz* 221
Tracking the amplitude versus offset (AVO) by using orthogonal polynomials. *T. A. Johansen, L. Bruland and J. Lutro* 245

NUMBER 3: APRIL 1995

Impact of processing on the amplitude versus offset response of a marine seismic data set. *A. Mazzotti and G. Ravagnan* 263
Determination of electrical resistivity, its anisotropy and heterogeneity on drill cores: a new method. *A. Rauen and H. C. Soffel* 283
Ultrasonic wave propagation in dry and brine-saturated sandstones as a function of effective stress: laboratory measurements and modelling. *G. Tao, M.S. King and M. Nabi-Bidhendi* 299
Median filter behaviour with seismic data. *G. Dunean and G. Beresford* 329
Restoration of missing offsets by parabolic Radon transform. *M. M. Nurul Kabir and D. J. Verschuur* 347

Using the pseudospectral method on curved grids for 2D elastic forward modelling. *Per Nielsen, Flemming If, Per Berg and Ove Skovgaard* 369
The stochastic inversion of magnetics and resistivity data using the simulated annealing agorithm. *J. K. Dittmer and J. E. Szymanski* 397
Direct current electric potential computation in an inhomogeneous and arbitrarily anisotropic layered earth. *Umesh C. Das* 417

NUMBER 4: MAY 1995

Long period multiple suppression by predictive deconvolution in the x–t domain. *M. Turhan Taner, Ronen F. O'Doherty and Fulton Koehler* 433
Phase inversion deconvolution for long and short period multiples attenuation. *Eugene Lichman and E. John Northwood* 469
Harmonic resonance structure and chaotic dynamics in the earth–vibrator system. *David Walker* 487
Imaging beneath an opaque basaltic layer using densely sampled wide-angle OBS data. *C. Samson, P. J. Barton and J. Karwatowski* 509
Quantitative evaluation of crosshole seismic reflection images using physical model data. *Peter S. Rowbotham and Neil R. Goulty* 529
Anisotropic velocity analysis. *C. M. Sayers* 541
Error estimation and optimization of gravity surveys. *Pierre Keating* 569

NUMBER 5: JULY 1995

Reflections from a randomly grooved interface: ultrasonic modelling and finite-difference calculation. *Craig A. Schultz and M. Nafi Toksöz* 581
Effect of clayey media parameters on the negative response of a coincident loop. *Hesham M. El-Kaliouby, Safwat A. Hussain, Abd El-Rahim Bayoumi, Essam A. El-diwany and Essam A. Hashish* 595
Cancelling directional EM noise in magnetotellurics. *G. Santarato and U. Spagnolini* 605
Surface NMR applied to an electroconductive medium. *D. V. Trushkin, O. A. Shushakov and A. V. Legchenko* 623
Shallow karst exploration using MT-VLT and DC resistivity methods. *Roger Guerin and Yves Benderitter* 635
Laboratory technique for measurement of spectral induced polarization response of soil samples. *Heikki Vanhala and Heikki Soininen* 655
A new method of quantitative interpretation of SP anomalies produced by a polarized inclined sheet. *George Skianis, Taxiarchis Papadopoulos, Dimitrios Vaiopoulos and Sotiris Nikolaou* 677
Ground penetrating radar antennae frequencies and transmitter powers compared for penetration depth, resolution and reflection continuity. *Harry M. Jol* 693

NUMBER 6: AUGUST 1995

P- and S-wave anisotropy of a synthetic sandstone with controlled crack geometry. *J. S. Rathore, E. Fjaer, R. M. Holt and L. Renlie* 711
Phase-shift migration with a variable-length spatial transform – an algorithm for moderately varying lateral velocities. *Alvin K. Benson* 729
On the application of geophysics in the exploration for copper and chrome ores in Albania. *Alfred Frasheri, Ligor Lubonja and Perparim Alikaj* 743
Monitoring soil contaminations using a contactless conductivity probe. *Ming Huang, Ce Liu, Liang C. Shen and David Shattuk* 759
Conventional and modern seismic investigations for rock quality determination at a dam site – a case study. *J. Louis, T. Papadopoulos, G. Drakatos and P. Pantzartzis* 779
Use of traveltime skips in refraction analysis to delineate velocity inversion. *H. C. Tewari M. M. Dixit and P. R. K. Murty* 793
Elastic anisotropy due to aligned cracks on porous rock. *Leon Thomsen* 805
Reflection points and surface points. *Franklyn K. Levin* 831
Finite-difference elastic wave propagation in 2D heterogeneous transversely isotropic media. *Christopher Juhlin* 843

NUMBER 7: OCTOBER 1995

Point-to-curve ray tracing in complicated geological models. *A. Hanyga and J. Pajchel* 859
Monitoring subsurface changes over time with cross-well electromagnetic tomography. *D. L. Alumbaugh and H. F. Morrison* 873
Downward continuation of $(V_s)_L$ profile in IP (time-domain) with linear excitation using point electrodes. A short note. *A. Apparao, R. Sivarama Sastry and V. Subrahmanya Sarma* 903
One dimensional non-linear inversion of magnetotelluric data: the importance of data errors. *R. Belay and T. M. Rasmussen* 905
Fourier finite-difference migration for steeply dipping reflectors with complex overburden. *T. Rühl, C. Kopp and D. Ristow* 919
The stable-beam seismic modelling method. *X. Wang and D. Waltham* 939
Accurate and efficient shot-gather dip moveout processing in the log-stretch domain. *B. Zhou, I. M. Mason and S. A. Greenhalgh* 963

NUMBER 8: NOVEMBER 1995

Non-linear inversion of resistivity profiling data for some regular geometrical bodies. *R. K. Chunduru, M. K. Sen, P. L. Stoffa and R. Nagendra* 979
3D depth migration by rotated McClellan filters. *B. Biondi and G. Palacharla* 1005

Frequency-domain modelling of airborne electromagnetic responses using staggered finite differences. *G. A. Newman and D. L. Alumbaugh* 1021
2.5D full-wavefield viscoacoustic inversion. *Q. Liao and G. A. McMechan* ... 1043
Smoothing seismically derived velocities. *H. J. Grubb and A. T. Walden* 1061
Detection of underground cavities with monofrequency electromagnetic tomography between boreholes in the frequency range 100 Mhz to 1 GHz. *P. Côte, P. Degauque, R. Lagabriell and N. Levent* 1083
